QUALITY MANAGEMENT PROCESS

TR Vertriebs GmbH has a holistic quality management process support by technical and manual multi-level checks. Each device undergoes a certified data-cleaning process, to ensure secure data wiping. In addition, the devices are tested by a specific software to identify hidden defects and ensure full functionality for our clients. Lastly, each device is undergoing a manual human conducted quality check and cleaning process. A test report is attached to the product to track the test results and technician, who conducted the tests.

CUSTOMER SUCCESS

TR Vertriebs GmbH acts as a responsible recycle supplier

The process is not only aimed to provide the best of quality at competitive prices for our clients, but also to act as a responsible supplier, covering multiple angles of environmental aspects as well data-security regulations. In addition, After-Sale service and quick RMA processes are key to our client relationships, opening doors for long-term partnerships.

SUPPLIER

CUSTOMER

Quick RMA processes with holistic troubleshooting to satisfy customers by high-quality standards and quick reaction

GRADE A

Functional Tests

A grade devices have passed all key functional tests. They appear flawless at first glance. > 80% Battery Health.

Pre-owned, 100% original.

Clean Cosmetics

They have a few, very minor blemishes that are only uncovered upon close inspection and/or rotating them under the light.

Clean Details

These blemishes are often found near the ports, corners or the Apple logo.

GRADE A/B

GRADE A/B

Grade A/B is the most sold stock in the market, since devices typically show minor signs of usage but wholesalers would like to offer a mix of A Grade and B Grade devices to their clients. The TR A/B Grade will give our clients an equal mix of A Grade and B Grade devices to enable our clients to offer both gradings to their clients and even for platform sellers to find the matching category to sell their products. Dots or marks may be visible on the camera and housing. Battery will have > 80% or more capacity.

Pre-owned, 100% original.

GRADE B

Functional Tests

B grade devices have passed all key functional tests. > 80% Battery Health.

Cosmetics

They may appear flawless at first glance. The Screen may either have several faint, small scratches or a few longer, faint scratches. The Housing may have light scuffs.

Details

The ports, corners, edges may have small dings, blemishes, and/or nicks. Dots on cameras may be present.

A small percentage may have one slightly more pronounced imperfection if they are in otherwise excellent condition.

GRADE C

Functional Tests

C grade devices have passed all key functional tests.
> 80% Battery Health.

Pre-owned, 100% original.

Heavy Use Cosmetics

They appear heavily used at first glance. They may have more pronounced, deeper scratches on their screen or housing they can be felt easily with a fingernail.

Details: Heavy wear & tear

The housing may have numerous scuffs, scratches, dents or other abnormalities. Ports, corners, and edges may have dings, dents and heavy wear.
